

Dmitrii Chichuk (@Jamminroot)

36 y/o

Not a big fan of pigeons

Recent activity

Across the year, the engineer focused on building a SaaS crypto trading platform, developing embedded HID firmware, conducting AI/ML research for trading and poker, and creating various automation and tooling projects.

Activity timeline (last 12 months)

2026 May

Windows input filter driver — `input-driver`

Developed a KMDF input filter driver for capturing and injecting keyboard and mouse events.

Mobile app for NZT — `deeplay-io/nzt-mobile-app`

Worked on the NZT mobile app, adding a product flavor and extended system information.

2026 Apr

Crypto trading platform development — `summit`

Built out the SaaS crypto algo trading platform with AI/NN features, including quickstart templates, billing, and deployment pipeline.

ESP32-S3 HID firmware — `j-uni-hid`

Iterated on feature-rich mouse and keyboard emulation firmware for ESP32-S3, adding new firmware variants.

Windows file tagging utility — `intag2`

Polished the Windows Explorer file-tagging tool, improving release workflows and fixing context menu issues.

CV and input emulation project — `MEMU3`

Worked on a personal C++ project for computer vision, mouse/keyboard emulation, and screen capture.

2026 Mar

Crypto price prediction research — `crypto-model-research`

Conducted R&D on a crypto price prediction model, experimenting with mixture-of-experts architectures and benchmarking.

Android LLM assistant — `ozwil-android`

Built an Android chat assistant with on-device LLM capabilities, implementing sub-agent delegation and tool routing.

ESP32-S3 HID firmware — `j-uni-hid`

Continued development on the HID firmware, adding new device variants and USB features.

Custom e-ink firmware — `papyrix`

Enhanced custom firmware for an e-ink device, adding map and knowledge base applications.

2026 Feb

Windows file tagging utility — `intag2`

Refined the file-tagging tool with CI/CD improvements, CLI additions, and Microsoft Store publishing.

Code intelligence engine — `jaxon`

Developed a graph-powered code intelligence engine with LSP integration and multi-language support.

YOLO labeling tool — `yolo-labeler`

Built a fast, minimalistic YOLO labeling tool for personal computer vision projects.

Neovim configuration — `.dotfiles`

Set up a personal Neovim IDE configuration with LSP, treesitter, and pre-commit hooks.

2026 Jan

Poker computer vision tool — poker-cv

Developed a CV pipeline for online poker, achieving high accuracy in hand and card detection.

ESP32-S3 HID firmware — j-uni-hid

Fixed connectivity issues and improved COM restart handling on the HID firmware.

Task management app — tasker

Built a task management app with touch event visualization and improved user experience.

CV and input emulation project — MEMU3

Updated the personal C++ project with new modes and HID click emulation.

2025 Dec

ESP32-S3 HID firmware — j-uni-hid

Worked extensively on firmware v11, adding new devices, performance modes, and BLE/USB touch features.

Autonomous AI coding tool — auto-claude

Enhanced an autonomous multi-session AI coding tool with squash merging and worktree completion tracking.

CV and input emulation project — MEMU3

Added USB HID mouse movement and rate limiting to the personal project.

n8n Claude Code node — n8n-nodes-claudecode

Updated the n8n node for Claude Code to use the Claude Agent SDK.

2025

Freqtrade trading strategies — freqtrade_startegies

Developed and optimized multiple trading strategies for Freqtrade, including backtesting and hyperopt.

Telegram bot for Freqtrade — freqtrade-tg-multibot

Built a Telegram bot to manage multiple Freqtrade instances, with a web interface and profit tracking.

Telegram assistant bot — pAssistant2

Worked on a Telegram bot with API integration and logging improvements.

Freqtrade monitoring app — freqtrade_monitor

Created a Flutter app for monitoring Freqtrade bots with charts and card UI.

2024

Freqtrade trading strategies — freqtrade_strats

Iterated on trading strategies with hyperopt optimization and backtesting.

Crypto signaler Telegram bot — CryptoSignalerBot

Built a Telegram bot that uses AI to generate crypto trading signals with charts.

ChatGPT Telegram bot — chatgpt_telegram_net

Maintained a .NET Telegram bot for ChatGPT with long message support.

Apollo server experiment — apollo_server

Experimented with a C++ server project using Asio.

Experience

.NET Developer / Tech Lead

Deeplay · Full-time

Jun 2021 – Present · 4 yrs 11 mos

Software Development Engineer

Akvelon (vendor for Microsoft) · Full-time

Mar 2019 – Oct 2021 · 2 yrs 7 mos
Ivanovo, Russia

- Developer in the Microsoft App Center SDK team
- Worked on .NET, Android, Apple, Cordova, Xamarin and React Native App Center SDKs

Developer

ICVR · Full-time

Sep 2018 – Feb 2019 · 5 mos
United States (remote)

- Built JetSetTV, an Android TV application, from scratch in a couple of months
- Worked on bug fixes and new features in Unity
- Set up CI/CD with Unity Cloud Build + GitLab
- Built a barebones REST API with ASP.NET

Full-stack Android developer

Konstanta, LLC · Full-time

Jan 2016 – Apr 2018 · 2 yrs 3 mos
Arkhangelsk, Russia

- Designed and built Android applications for clients across multiple verticals
- Worked with cross-functional teams; integrated third-party APIs; wrote unit tests
- Developed and deployed several b2b systems on 1C:Enterprise
- Built software for tracking Parkinson's disease patients (prescriptions, treatments, signs, test results) on 1C:Enterprise

Full-stack ERP developer

Konstanta, LLC · Full-time

Aug 2012 – Jan 2016 · 3 yrs 5 mos
Arkhangelsk, Russia

- Specified, customized and tested 1C ERP/CRM features for end users
- Authored help documentation; defined ERP design and coding standards
- Worked with end users to translate business processes into technical solutions
