

Dmitrii Chichuk (@Jamminroot)

36 y/o

Not a big fan of pigeons

Recent activity

Worked extensively on a SaaS crypto algorithmic trading platform, completing a major .NET rewrite and infrastructure setup. Added advanced features like proxy infrastructure, strategy templates, and service-account authentication.

Activity timeline (last 12 months)

2026 Jun

Crypto trading platform rewrite and deployment — summit

Worked on the SaaS crypto algo trading platform, focusing on the .NET rewrite, deployment pipeline, and service-account auth.

Minimal AutoHotKey alternative — jolt

Started a minimal C++ automation tool with interception support and typed actions.

2026 May

Firmware development for ESP32-S3 HID device — j-uni-hid

Iterated on feature-rich mouse and keyboard emulation firmware, adding new device variants and fire-and-forget emitting.

Windows input filter driver — input-driver

Built a KMDF input filter and injection driver with a testing framework and library enhancements.

File tagging tool for Windows Explorer — intag2

Maintained the C++ file and folder tagging utility, fixing encoding issues and improving metadata handling.

Android text-to-speech engine — j-tts-android

Developed a multi-engine TTS app with pitch control, RuNorm text normalization, and Vosk-based voice input.

2026 Apr

Crypto trading platform feature rollout — summit

Continued building the automated trading platform, adding proxy infrastructure, strategy templates, and billing overhaul.

New firmware variant for ESP32-S3 — j-uni-hid

Drafted a new firmware variant for the HID device and fixed connectivity issues.

CI/CD for file tagging tool — intag2

Set up release automation for the Windows Explorer file-tagging utility.

Computer vision and automation tool — MEMU3

Enhanced a computer vision utility with YOLO model improvements and bow/flick assist features.

2026 Mar

Crypto price prediction model research — crypto-model-research

Experimented with neural network architectures for crypto price prediction, including mixture of experts and ensemble models.

On-device LLM assistant for Android — ozwil-android

Built a mobile AI assistant with sub-agent delegation, model presets, and local inference capabilities.

HID firmware hardware variants — j-uni-hid

Developed firmware updates for multiple ESP32 variants, including USB and dual-core versions.

Automation tool with overlay and YOLO — MEMU3

Added mode persistence, YOLO confidence control, and status display to the automation utility.

2026 Feb

Microsoft Store publishing and CLI — intag2

Automated store publishing and added CLI features to the file tagging utility.

Code knowledge graph engine — jaxon

Expanded a code intelligence tool with LSP integration, DI detection, and broader language support.

2026 Jan

Online poker CV research tool — poker-cv

Developed a computer vision pipeline for poker table state recognition and hand history reconstruction.

2025

Telegram trading bot multi-instance tool — freqtrade-tg-multibot

Built a C# web application for managing multiple Freqtrade bots with Telegram authentication and daily profit tracking.

Autonomous AI coding assistant — auto-claude

Developed an autonomous multi-session AI coding tool with worktree management and squash merging.

Experience

Tech Lead

Sep 2024 – Present · 1 yr 9 mos

Deeplay · Full-time

- Lead engineering on a real-time desktop application for intellectual/skill-based online games statistics and analytics; own architecture, roadmap, and the release pipeline shipping to 10+ target online platforms.
- Set technical direction and run ongoing code review as the primary quality gate.
- Hands-on across the stack: C# / .NET backend, Kotlin Android companion app, CI/CD, dynamic server configuration.
- Built and maintain internal frameworks — notably an image/video tool for previewing and scaling rectangular regions — adopted team-wide for QA and content production.

Lead .NET Developer

Oct 2023 – Aug 2024 · 10 mos

Deeplay · Full-time

- Owned end-to-end backend feature delivery (C# / .NET); drove cross-component design decisions and stability work.
- Coordinated release rollouts across 10+ target online platforms; tightened the deployment pipeline.
- Standardised internal tooling and authored team-wide operational runbooks; mentored junior engineers.
- Continued maintenance of the Android companion app (Kotlin) and internal annotation frameworks.

Senior .NET Developer

Jun 2021 – Sep 2023 · 2 yrs 3 mos

Deeplay · Full-time

- Shipped backend features (C# / .NET) for a real-time desktop application for intellectual/skill-based online games statistics and analytics, supporting 10+ target online platforms.
- Built and maintained the companion Android app (Kotlin): telemetry, CI/CD, dynamic server configuration, in-app updates.
- Authored internal frameworks including an image/video annotation tool for scaled rectangle previews — adopted across the team.
- Mentored junior engineers and wrote team onboarding documentation: workspace setup, conventions, operational runbooks.

Software Development Engineer

Akvelon (vendor for Microsoft) · Full-time

Mar 2019 – Oct 2021 · 2 yrs 7 mos
Ivanovo, Russia

- Developer in the Microsoft App Center SDK team
- Worked on .NET, Android, Apple, Cordova, Xamarin and React Native App Center SDKs

Developer

ICVR · Full-time

Sep 2018 – Feb 2019 · 5 mos
United States (remote)

- Built JetSetTV, an Android TV application, from scratch in a couple of months
- Worked on bug fixes and new features in Unity
- Set up CI/CD with Unity Cloud Build + GitLab
- Built a barebones REST API with ASP.NET

Full-stack Android developer

Konstanta, LLC · Full-time

Jan 2016 – Apr 2018 · 2 yrs 3 mos
Arkhangelsk, Russia

- Designed and built Android applications for clients across multiple verticals
- Worked with cross-functional teams; integrated third-party APIs; wrote unit tests
- Developed and deployed several b2b systems on 1C:Enterprise
- Built software for tracking Parkinson's disease patients (prescriptions, treatments, signs, test results) on 1C:Enterprise

Full-stack ERP developer

Konstanta, LLC · Full-time

Aug 2012 – Jan 2016 · 3 yrs 5 mos
Arkhangelsk, Russia

- Specified, customized and tested 1C ERP/CRM features for end users
- Authored help documentation; defined ERP design and coding standards
- Worked with end users to translate business processes into technical solutions

Selected projects

summit · C#

SaaS crypto algorithmic trading platform with AI and neural network components.

j-uni-hid · C++

Feature-rich mouse and keyboard emulation firmware for ESP32-S3.

input-driver · C

Windows input filter and injection driver similar to Interception.

crypto-model-research · Python

R&D project for crypto price prediction models.

poker-cv · Python

Computer vision experiments for online poker platforms.

intag2 · C++

Assign tags to files and folders in Windows Explorer.

j-tts-android · Kotlin

Android TTS engine using Silero and phonetizers.

ozwil-android · Kotlin

LLM-powered Android assistant with phone control capabilities.

freqtrade-tg-multibot · C#

Multi-bot Telegram interface for Freqtrade with web dashboard.

auto-claude · TypeScript

Autonomous multi-session AI coding tool.
