

Dmitrii Chichuk (@Jamminroot)

36 y/o

Not a big fan of pigeons

Skills

Languages: C# / .NET · Kotlin · TypeScript / Node.js · Python · C / C++

Backend: ASP.NET · gRPC / Protobuf · WebSockets · PostgreSQL · Redis · high-throughput billing & metering · real-time event processing

Infrastructure: Kubernetes · Docker · GitHub Actions · GitLab CI · release engineering · S3

Data & observability: ClickHouse · Grafana · metrics & alerting design · analytics pipelines

Mobile & desktop: Android (Kotlin) · accessibility services · desktop applications · UI automation

AI & automation: LLM integrations · AI assistants with knowledge bases · computer vision · n8n / workflow automation

Leadership: team leadership (14 engineers) · architecture & system design · code review · mentoring · UX direction

Recent activity (last 12 months)

Auto-generated weekly from GitHub commit history · updated 2026-06-15

Built and hardened a SaaS crypto trading platform with AI capabilities, while developing custom input firmware and a Windows kernel driver for HID emulation.

Activity timeline (last 12 months)

2026 Jun

SaaS crypto trading platform development — summit

Polished the web build and authentication system for the AI-driven trading platform.

Minimal input automation tool — jolt

Started a lightweight AutoHotKey alternative with interception driver support.

2026 May

ESP32-S3 HID firmware iteration — j-uni-hid

Iterated on feature-rich mouse and keyboard emulation firmware for ESP32-S3.

Windows input filter driver — input-driver

Developed a KMDF input filter driver for capturing and injecting keyboard and mouse events.

Android TTS engine enhancements — j-tts-android

Expanded the Android text-to-speech engine with new models and intonation controls.

Personal CV project work — MEMU3

Worked on a personal C++ project involving mouse/keyboard emulation and screen overlay.

2026 Apr

Crypto trading platform feature push — summit

Built out proxy infrastructure, billing, strategy templates, and UI overhaul for the trading platform.

Windows Explorer file-tagging utility — intag2

Maintained the Windows Explorer file and folder tagging extension.

E-reader custom firmware — papyrix

Built a map application and knowledge base for custom e-reader firmware.

Proxy client maintenance — FICLash

Updated a Clash proxy client fork with new transport support.

2026 Mar

Crypto price prediction research — [crypto-model-research](#)

Conducted deep research on mixture-of-experts architectures for crypto price prediction.

On-device LLM assistant — [ozwil-android](#)

Built an Android LLM assistant with tool-use and on-device model capabilities.

E-ink launcher development — [blackboard-launcher](#)

Developed a note-taking-centric launcher for E-ink Android readers.

2026 Feb

Code intelligence engine — [jaxon](#)

Built a graph-powered code intelligence engine with LSP integration.

n8n Telegram node maintenance — [n8n-nodes-telepilot-2](#)

Maintained a forked n8n community node for Telegram automation.

Neovim configuration — [.dotfiles](#)

Maintained a personal Neovim development environment configuration.

2026 Jan

Poker computer vision research — [poker-cv](#)

Developed a computer vision pipeline for online poker state extraction.

2025

Crypto trading strategies — [freqtrade_startegies](#)

Developed and optimized numerous algorithmic trading strategies.

Autonomous AI coding tool — [auto-claude](#)

Built an autonomous multi-session AI coding assistant.

Telegram automation tooling — [freqtrade-tg-multibot](#)

Worked on a Telegram bot for managing crypto trading operations.

Content aggregation bot — [pAssistant](#)

Developed a Telegram-based content aggregation and forwarding bot.

Experience

Tech Lead

Sep 2024 – Present · 1 yr 9 mos

Deeplay · Full-time

- Lead a 14-person engineering team (7 developers, 2 reverse engineers, 2 L2 diagnostics experts, DevOps, 2 QA) building a real-time desktop application for intellectual/skill-based online games statistics and analytics; own architecture, roadmap, and the release pipeline shipping to 10+ target online platforms. Regularly drive cross-team efforts with analysts, technical writers, and project managers beyond my direct hierarchy.
- Led end-to-end development and launch of major product initiatives — a computer-vision pipeline, a desktop client, an agent/partner network, and several cloud-based services — owning architecture, core use scenarios, and UX direction. The desktop client drew 100+ organic access requests before any public announcement.
- Technically curated a series of product launches, each adding 5–30% to revenue.
- Single-handedly re-engineered the pricing mechanics of a billing system processing 0.5–1.5M operations per day; rolled it out to production with ~2 minutes of downtime and a seamless transition for clients.
- Shipped a customer-facing AI assistant backed by a curated knowledge base: account lifecycle, authentication, knowledge-base tooling, and failure alerting.
- Built the observability stack ingesting ~10M events/day: ClickHouse + Grafana metrics and alerting, messenger notifications, and internal diagnostic tools including screenshot-based remote debugging.
- Routinely build internal tooling that automates monotonous operational work — data converters with validation gates, log retrieval, admin UIs, and workflow integrations (n8n pipelines, custom hooks, Telegram/Mattermost clients).
- Primary quality gate for a codebase shipping ~50 PRs/month (250+ formal reviews on record); mentored 6

engineers end-to-end — several began onboarding newcomers themselves — before delegating day-to-day mentorship in 2025.

- Hands-on across the stack: C# / .NET backend, Kotlin Android companion app serving up to 2.5k DAU (including an accessibility-based input automation engine), CI/CD, dynamic server configuration.

Lead .NET Developer

Oct 2023 – Aug 2024 · 10 mos

Deeplay · Full-time

- Owned end-to-end backend feature delivery (C# / .NET); drove cross-component design decisions and stability work.
- Led a platform-wide migration of 10+ production integrations onto a new shared core in a single coordinated sweep.
- Owned release engineering for a 13-service fleet on Kubernetes — 350+ versioned production releases shipped over my tenure — including capacity management and credential/endpoint migrations across two product lines.
- Extended protocol-level integrations with new session modes, event types, and dynamic pricing flows.
- Standardised internal tooling and authored team-wide operational runbooks; mentored junior engineers.
- Continued maintenance of the Android companion app (Kotlin) and internal annotation frameworks.

Senior .NET Developer

Jun 2021 – Sep 2023 · 2 yrs 3 mos

Deeplay · Full-time

- Shipped backend features (C# / .NET) for a real-time desktop application for intellectual/skill-based online games statistics and analytics, supporting 10+ target online platforms.
- Engineered protocol-level platform integrations: transformed captured, decoded network traffic into consistent real-time session state with reconnect, recovery, and catch-up handling; took three integrations from empty repository to production, the largest — including a full secondary real-time subsystem — in ~6 months.
- Rolled out a shared rules-based classification engine across the entire integration fleet.
- Acted as de-facto release manager: coordinated hundreds of staged rollouts across test/stage/production environments on Kubernetes.
- Built and maintained the companion Android app (Kotlin): telemetry, CI/CD, dynamic server configuration, in-app updates.
- Authored internal frameworks including an image/video annotation tool for scaled rectangle previews — adopted across the team.
- Mentored junior engineers and wrote team onboarding documentation: workspace setup, conventions, operational runbooks.

Software Development Engineer

Mar 2019 – Oct 2021 · 2 yrs 7 mos

Ikvelon (vendor for Microsoft) · Full-time

Ivanovo, Russia

- Developer in the Microsoft App Center SDK team
- Worked on .NET, Android, Apple, Cordova, Xamarin and React Native App Center SDKs

Developer

Sep 2018 – Feb 2019 · 5 mos

ICVR · Full-time

United States (remote)

- Built JetSetTV, an Android TV application, from scratch in a couple of months
- Worked on bug fixes and new features in Unity
- Set up CI/CD with Unity Cloud Build + GitLab
- Built a barebones REST API with ASP.NET

Full-stack Android developer

Jan 2016 – Apr 2018 · 2 yrs 3 mos

Konstanta, LLC · Full-time

Arkhangelsk, Russia

- Designed and built Android applications for clients across multiple verticals
- Worked with cross-functional teams; integrated third-party APIs; wrote unit tests
- Developed and deployed several b2b systems on 1C:Enterprise
- Built software for tracking Parkinson's disease patients (prescriptions, treatments, signs, test results) on 1C:Enterprise

Full-stack ERP developer

Konstanta, LLC · Full-time

Aug 2012 – Jan 2016 · 3 yrs 5 mos
Arkhangelsk, Russia

- Specified, customized and tested 1C ERP/CRM features for end users
- Authored help documentation; defined ERP design and coding standards
- Worked with end users to translate business processes into technical solutions

Selected projects

summit · C#

SaaS crypto algorithmic trading platform with AI and neural network components.

j-uni-hid · C++

Feature-rich mouse and keyboard emulation firmware for ESP32-S3.

input-driver · C

Windows input filter and injection driver similar to Interception.

freqtrade_strategies · Python

Collection of Freqtrade trading strategies with optimized parameters.

crypto-model-research · Python

R&D project for crypto price prediction models.

poker-cv · Python

Computer vision experiments for online poker platforms.

intag2 · C++

Assign tags to files and folders in Windows Explorer.

j-tts-android · Kotlin

Android TTS engine using Silero and phonetizers.

ozwil-android · Kotlin

LLM-powered Android assistant with phone control capabilities.

freqtrade-tg-multibot · C#

Multi-bot Telegram interface for Freqtrade with web dashboard.
