

Dmitrii Chichuk (@Jamminroot)

36 y/o

Not a big fan of pigeons

Recent activity

Developed a SaaS crypto trading platform with AI and neural network features, built embedded firmware for input devices, and conducted machine learning research for crypto prediction and computer vision. Also worked on Android apps for TTS and LLM-based assistants, and maintained various trading and automation tools.

Activity timeline (last 12 months)

2026 May

ESP32-S3 HID firmware development — j-uni-hid

Iterated on the feature-rich mouse and keyboard emulation firmware for ESP32-S3, adding new device variants and performance improvements.

Windows input filter driver — input-driver

Built and tested a Windows kernel-mode input filter and injection driver, adding push-style event delivery and integration tests.

Windows Explorer file-tagging utility — intag2

Polished the file and folder tagging utility for Windows Explorer, fixing encoding and metadata handling.

Android text-to-speech app — j-tts-android

Developed an Android TTS app with multiple engine support, intonation controls, and Russian language processing.

Computer vision aim assist tool — MEMU3

Worked on a computer vision-based aim assist and input emulation tool, adding GPU inference and refining tracking features.

E-ink device firmware expansion — biscuit

Expanded the biscuit firmware for xteink 4 with a knowledge base app, FB2 reader, and mesh chat improvements.

2026 Apr

Crypto trading platform development — summit

Built and hardened a SaaS crypto algorithmic trading platform with AI and neural network features, including deployment pipeline and MCP server.

HID firmware variant development — j-uni-hid

Continued development of the ESP32-S3 HID firmware, drafting a new variant and fixing connectivity issues.

File-tagging utility maintenance — intag2

Maintained the Windows Explorer file-tagging utility, improving metadata handling and release workflows.

E-ink device custom firmware — papyrix

Developed a custom firmware for xteink devices with map rendering, knowledge base, and icon-based home screen.

Proxy client maintenance — FICLash

Updated a Flutter-based proxy client with new transport support and API compatibility.

Proxy core fork update — Clash.Meta

Maintained a fork of the Clash.Meta proxy core, exposing additional APIs for the FICLash client.

2026 Mar

HID firmware version iteration — j-uni-hid

Released new versions of the ESP32-S3 HID firmware with dual-core and USB support.

Crypto price prediction research — crypto-model-research

Conducted machine learning research on crypto price prediction, experimenting with mixture-of-experts architectures and ensemble methods.

On-device LLM assistant — ozwil-android

Built an Android app for on-device LLM-based assistance with tool use and sub-agent delegation.

E-ink note-taking launcher — blackboard-launcher

Developed a minimal Android launcher optimized for e-ink devices, focusing on note-taking and gesture navigation.

E-ink firmware app development — papyrix

Added map and knowledge base apps to the custom e-ink firmware, with UI rewrites and encoding support.

2026 Feb

Windows file-tagging utility release engineering — intag2

Worked on release engineering for the file-tagging utility, including CI/CD pipelines, Microsoft Store publishing, and CLI improvements.

Code intelligence engine — jaxon

Developed a graph-powered code intelligence engine with LSP integration and multi-language support.

YOLO annotation tool — yolo-labeler

Built a fast, minimalistic YOLO annotation tool with batch editing features.

Neovim configuration — .dotfiles

Maintained a personal Neovim configuration with IDE-like setup and remote clipboard support.

Dotfiles management — dotfiles

Set up chezmoi-managed dotfiles with encrypted SSH configuration.

n8n Telegram node fork — n8n-nodes-telepilot-2

Maintained a fork of the n8n Telegram node, fixing authentication issues and adding new triggers.

File-tagging utility documentation — intag

Updated documentation and release notes for the Windows file-tagging utility.

2026 Jan

HID firmware bug fixes — j-uni-hid

Fixed connectivity and restart issues in the ESP32-S3 HID firmware.

Poker computer vision research — poker-cv

Developed a computer vision pipeline for online poker, achieving high accuracy in hand and board card detection.

n8n Claude Code node — n8n-nodes-claudecode

Updated an n8n node for Claude Code integration, migrating to the Claude Agent SDK.

Task management app — tasker

Improved a task management app with better touch visualization and direct launch features.

2025 Dec

HID firmware v11 development — j-uni-hid

Developed version 11 of the ESP32-S3 HID firmware with BLE, touch, and performance profiles.

AI coding automation tool — auto-claude

Built an autonomous multi-session AI coding tool with worktree management and Git rules integration.

Aim assist tool development — MEMU3

Added new modes and HID mouse movement features to the computer vision aim assist tool.

n8n Claude Code node update — n8n-nodes-claudecode

Released version 0.4.0 of the n8n Claude Code node with SDK migration.

2025

Freqtrade Telegram bot — freqtrade-tg-multibot

Developed a Telegram bot for monitoring Freqtrade trading bots, with web dashboard and profit tracking.

Telegram assistant bot — pAssistant

Worked on a Telegram bot for content forwarding and summarization.

Telegram bot rewrite — pAssistant2

Started a rewrite of the Telegram assistant bot with improved logging and API handling.

Content collection tool — jContentCollector

Built a content collection tool with ad filtering and webhook integration.

Freqtrade trading strategies — freqtrade_startegies

Developed and optimized multiple trading strategies for the Freqtrade bot, including backtesting and parameter tuning.

Freqtrade custom loss functions — freqtrade_user_data

Added custom loss functions for Freqtrade strategy optimization.

ChatGPT Telegram bot — chatgpt_telegram_net

Maintained a .NET-based ChatGPT Telegram bot.

PowerShell profile — powershell_profile

Maintained a personal PowerShell profile configuration.

File-tagging utility private prototype — intag2_private

Started a private prototype for a file-tagging utility UI.

2024

Freqtrade strategy optimization — freqtrade_strats

Optimized Freqtrade trading strategies with hyperparameter tuning and risk management.

C++ server experiment — apollo_server

Experimented with a C++ server project using Asio.

Notes repository — notes

Initialized a personal notes repository.

File-tagging utility early development — intag

Early development of the Windows file-tagging utility, including CLI and UI polish.

Experience

.NET Developer / Tech Lead

Jun 2021 – Present · 5 yrs

Deeplay · Full-time

Software Development Engineer

Mar 2019 – Oct 2021 · 2 yrs 7 mos

Akvelon (vendor for Microsoft) · Full-time

Ivanovo, Russia

- Developer in the Microsoft App Center SDK team
- Worked on .NET, Android, Apple, Cordova, Xamarin and React Native App Center SDKs

Developer

Sep 2018 – Feb 2019 · 5 mos

ICVR · Full-time

United States (remote)

- Built JetSetTV, an Android TV application, from scratch in a couple of months
- Worked on bug fixes and new features in Unity
- Set up CI/CD with Unity Cloud Build + GitLab
- Built a barebones REST API with ASP.NET

Full-stack Android developer

Jan 2016 – Apr 2018 · 2 yrs 3 mos

Konstanta, LLC · Full-time

Arkhangelsk, Russia

- Designed and built Android applications for clients across multiple verticals
- Worked with cross-functional teams; integrated third-party APIs; wrote unit tests
- Developed and deployed several b2b systems on 1C:Enterprise
- Built software for tracking Parkinson's disease patients (prescriptions, treatments, signs, test results) on 1C:Enterprise

Full-stack ERP developer

Konstanta, LLC · Full-time

Aug 2012 – Jan 2016 · 3 yrs 5 mos
Arkhangelsk, Russia

- Specified, customized and tested 1C ERP/CRM features for end users
- Authored help documentation; defined ERP design and coding standards
- Worked with end users to translate business processes into technical solutions

Selected projects

summit · C#

SaaS crypto algorithmic trading platform with AI and neural network components.

j-uni-hid · C++

Feature-rich mouse and keyboard emulation firmware for ESP32-S3.

input-driver · C

Windows input filter and injection driver similar to Interception.

crypto-model-research · Python

R&D project for crypto price prediction models.

poker-cv · Python

Computer vision experiments for online poker platforms.

freqtrade_strats · Python

Personal trading strategy experiments for Freqtrade.

intag2 · C++

Assign tags to files and folders in Windows Explorer.

j-tts-android · Kotlin

Android TTS engine using Silero and phonetizers.

ozwil-android · Kotlin

LLM-powered Android assistant with phone control capabilities.

freqtrade-tg-multibot · C#

Multi-bot Telegram interface for Freqtrade with web dashboard.
