

Dmitrii Chichuk (@Jamminroot)

36 y/o

Not a big fan of pigeons

Recent activity

Over the past year, the engineer focused heavily on building a SaaS crypto trading platform, developing embedded firmware for input devices, and conducting deep learning research for crypto price prediction. Additional work spanned Windows kernel drivers, computer vision for poker, Android AI assistants, and various automation and tooling projects.

Activity timeline (last 12 months)

2026 May

Windows input filter driver development — input-driver

Built and iterated on a kernel-mode input filtering and injection driver for Windows, adding integration tests and a push-style event delivery library.

2026 Apr

SaaS crypto trading platform development — summit

Worked extensively on a crypto algo-trading platform, building out proxy infrastructure, billing models, strategy templates, and a full .NET rewrite with deployment pipelines.

ESP32-S3 input emulation firmware — j-uni-hid

Developed new firmware variants for a feature-rich mouse and keyboard emulation device running on ESP32-S3.

Windows Explorer file-tagging utility — intag2

Polished a Windows Explorer extension for tagging files and folders, focusing on release workflows and metadata handling.

Personal CV and input automation project — MEMU3

Iterated on a computer vision and input automation project, adding aim assist features and overlay improvements.

Custom e-reader firmware — papyrix

Enhanced custom firmware for an e-reader device, adding a map application, knowledge base, and improved book format support.

Proxy utility fork maintenance — FICLash

Updated a forked proxy utility with new transport support and API re-exposures.

2026 Mar

Crypto price prediction model research — crypto-model-research

Conducted deep learning research on crypto price prediction, experimenting with mixture-of-experts architectures and model benchmarking.

Android AI assistant with phone control — ozwil-android

Built an on-device LLM assistant for Android, implementing sub-agent delegation, tool routing strategies, and model management.

E-ink note-taking launcher — blackboard-launcher

Developed a minimalist Android launcher centered around note-taking for e-ink devices.

2026 Feb

Code intelligence engine — jaxon

Built a graph-powered code intelligence engine with multi-language support and LSP integration for AI agents.

Neovim configuration and dotfiles — .dotfiles

Maintained a personal Neovim IDE setup and dotfiles, migrating to newer APIs and adding remote clipboard

support.

YOLO labeling tool — yolo-labeler

Created a fast, minimalistic on-host labeling tool for YOLO object detection projects.

2026 Jan

Computer vision for online poker — poker-cv

Developed a computer vision pipeline for analyzing online poker games, focusing on hand reconstruction and state validation.

Telegram automation node for n8n — n8n-nodes-telepilot-2

Maintained a fork of a Telegram automation node for n8n, resolving authentication and session storage issues.

Claude Code n8n integration — n8n-nodes-claudecode

Updated an n8n node for AI coding assistance to use the latest Claude Agent SDK.

Android task management app — tasker

Worked on a task management application for Android, improving user experience and touch visualization.

2025

Firmware for ESP32 input devices — j-uni-hid

Developed multiple hardware versions of a mouse and keyboard emulation firmware, adding BLE, USB touch, and performance profiles.

Autonomous AI coding tool — auto-claude

Contributed to an autonomous multi-session AI coding tool, adding squash merging and worktree management features.

Freqtrade strategy development — freqtrade_strategies

Created and optimized numerous algorithmic trading strategies for the Freqtrade platform.

Freqtrade Telegram multi-bot — freqtrade-tg-multibot

Built a Telegram bot interface for managing multiple Freqtrade instances, with a web application and Docker support.

Flutter trading monitor app — freqtrade_monitor

Developed a mobile monitoring app for trading bots, featuring profit charts and a card-based UI.

Telegram automation and content collection — pAssistant

Worked on Telegram-based automation tools for content forwarding, summarization, and multi-target sending.

2024

Freqtrade strategy hyperoptimization — freqtrade_strats

Conducted hyperparameter optimization and backtesting for crypto trading strategies.

AI-powered crypto signaler bot — CryptoSignalerBot

Built a Telegram bot that used AI to generate and format crypto trading signals with technical analysis.

ChatGPT Telegram bot — chatgpt_telegram_net

Developed a .NET-based Telegram bot for interacting with ChatGPT.

Experience

.NET Developer / Tech Lead

Deeplay · Full-time

Jun 2021 – Present · 4 yrs 11 mos

Software Development Engineer

Akvelon (vendor for Microsoft) · Full-time

Mar 2019 – Oct 2021 · 2 yrs 7 mos
Ivanovo, Russia

- Developer in the Microsoft App Center SDK team
- Worked on .NET, Android, Apple, Cordova, Xamarin and React Native App Center SDKs

Developer

ICVR · Full-time

Sep 2018 – Feb 2019 · 5 mos
United States (remote)

- Built JetSetTV, an Android TV application, from scratch in a couple of months
- Worked on bug fixes and new features in Unity
- Set up CI/CD with Unity Cloud Build + GitLab
- Built a barebones REST API with ASP.NET

Full-stack Android developer

Konstanta, LLC · Full-time

Jan 2016 – Apr 2018 · 2 yrs 3 mos
Arkhangelsk, Russia

- Designed and built Android applications for clients across multiple verticals
- Worked with cross-functional teams; integrated third-party APIs; wrote unit tests
- Developed and deployed several b2b systems on 1C:Enterprise
- Built software for tracking Parkinson's disease patients (prescriptions, treatments, signs, test results) on 1C:Enterprise

Full-stack ERP developer

Konstanta, LLC · Full-time

Aug 2012 – Jan 2016 · 3 yrs 5 mos
Arkhangelsk, Russia

- Specified, customized and tested 1C ERP/CRM features for end users
- Authored help documentation; defined ERP design and coding standards
- Worked with end users to translate business processes into technical solutions

Last 12 months on GitHub: 2,514 contributions · 2,151 public commits · 132 PRs · 195 reviews. Generated 2026-05-10.
