

Dmitrii Chichuk (@Jamminroot)

36 y/o

Not a big fan of pigeons

Recent activity

Heavily focused on building a SaaS crypto trading platform with AI capabilities, alongside significant work on embedded firmware for input emulation and a Windows kernel driver. Also maintained several research projects in crypto modeling, computer vision for poker, and various automation tools.

Activity timeline (last 12 months)

2026 May

Windows input filter driver development — input-driver

Built and iterated on a kernel-level input filtering and injection driver for Windows.

2026 Apr

Crypto trading platform development — summit

Iterated on a SaaS crypto algorithmic trading platform, focusing on infrastructure, user onboarding, and security hardening.

Firmware for ESP32-S3 input emulation — j-uni-hid

Developed new firmware variants for a feature-rich mouse and keyboard emulation device.

File tagging utility for Windows Explorer — intag2

Polished a Windows Explorer extension for tagging files and folders, including release automation.

Personal CV and input automation project — MEMU3

Worked on a computer vision and input automation utility.

Custom firmware for e-reader device — papyrix

Added map and knowledge base applications to a custom e-reader firmware.

2026 Mar

Crypto price prediction model research — crypto-model-research

Conducted experiments on machine learning architectures for cryptocurrency price prediction.

Android LLM assistant with phone control — ozwil-android

Built an on-device LLM assistant capable of using phone functions, focusing on model routing and tool execution.

E-ink note-taking launcher for Android — blackboard-launcher

Developed a minimal Android launcher centered around note-taking for e-ink devices.

2026 Feb

Graph-powered code intelligence engine — jaxon

Developed a codebase indexing tool that builds knowledge graphs for AI agents and developers.

Personal Neovim development environment — .dotfiles

Maintained a personal Neovim configuration for a full IDE setup.

YOLO labeling tool — yolo-labeler

Built a minimalistic, browser-based labeling tool for YOLO object detection projects.

2026 Jan

Computer vision for online poker — poker-cv

Developed a computer vision pipeline for interpreting and validating online poker game states.

2025

Crypto trading platform foundation — summit

Started a complete rewrite of a crypto trading platform, laying the groundwork for a new SaaS product.

Multi-session AI coding tool — auto-claude

Built an autonomous AI coding assistant capable of managing multiple work sessions.

Freqtrade trading strategies — freqtrade_startegies

Developed and optimized numerous algorithmic trading strategies for the Freqtrade platform.

Telegram bot for trading management — freqtrade-tg-multibot

Created a Telegram bot interface for managing and monitoring multiple Freqtrade instances.

Mobile trading monitor — freqtrade_monitor

Built a mobile application for monitoring the performance of algorithmic trading bots.

Telegram automation tooling — pAssistant

Worked on a personal Telegram automation and content forwarding tool.

2024

Algorithmic trading strategy research — freqtrade_strats

Experimented with and optimized various trading strategies for the Freqtrade platform.

Crypto trading signal bot — CryptoSignalerBot

Developed a Telegram bot for generating and sharing cryptocurrency trading signals.

Experience

.NET Developer / Tech Lead

Deeplay · Full-time

Jun 2021 – Present · 4 yrs 11 mos

Software Development Engineer

Akvelon (vendor for Microsoft) · Full-time

Mar 2019 – Oct 2021 · 2 yrs 7 mos
Ivanovo, Russia

- Developer in the Microsoft App Center SDK team
- Worked on .NET, Android, Apple, Cordova, Xamarin and React Native App Center SDKs

Developer

ICVR · Full-time

Sep 2018 – Feb 2019 · 5 mos
United States (remote)

- Built JetSetTV, an Android TV application, from scratch in a couple of months
- Worked on bug fixes and new features in Unity
- Set up CI/CD with Unity Cloud Build + GitLab
- Built a barebones REST API with ASP.NET

Full-stack Android developer

Konstanta, LLC · Full-time

Jan 2016 – Apr 2018 · 2 yrs 3 mos
Arkhangelsk, Russia

- Designed and built Android applications for clients across multiple verticals
- Worked with cross-functional teams; integrated third-party APIs; wrote unit tests
- Developed and deployed several b2b systems on 1C:Enterprise
- Built software for tracking Parkinson's disease patients (prescriptions, treatments, signs, test results) on 1C:Enterprise

Full-stack ERP developer

Konstanta, LLC · Full-time

Aug 2012 – Jan 2016 · 3 yrs 5 mos
Arkhangelsk, Russia

- Specified, customized and tested 1C ERP/CRM features for end users
- Authored help documentation; defined ERP design and coding standards
- Worked with end users to translate business processes into technical solutions
