

Dmitrii Chichuk (@Jamminroot)

36 y/o

Not a big fan of pigeons

Recent activity

Across the year, the engineer focused on building a SaaS crypto trading platform, developing firmware for HID devices, and conducting AI research for trading and poker. Additional work spanned Android LLM assistants, Windows utilities, and automation tooling.

Activity timeline (last 12 months)

2026 May

Windows input filter driver development — input-driver

Built a KMDF input filter driver for capturing and injecting keyboard/mouse events, adding integration tests and library features.

2026 Apr

Crypto trading platform iteration — summit

Iterated on the SaaS crypto trading platform, adding infrastructure, security hardening, and user-facing features like templates and topology visualization.

Firmware iteration for ESP32-S3 HID device — j-uni-hid

Continued development of the mouse/keyboard emulation firmware, adding new hardware variants and stability fixes.

File tagging utility maintenance — intag2

Polished the Windows Explorer file-tagging tool, fixing metadata handling and release workflow.

Aim assist and overlay tool development — MEMU3

Worked on a personal C++ project for aim assist with YOLO detection, overlay, and input emulation.

2026 Mar

Firmware version upgrades — j-uni-hid

Added dual-core and USB support for new firmware versions of the HID emulation device.

Crypto price prediction model research — crypto-model-research

Conducted research on deep learning models for crypto price prediction, experimenting with Mixture of Experts architectures and benchmarking.

Android LLM assistant with phone control — ozwil-android

Developed an Android app for on-device LLM with tool use, implementing sub-agent delegation and model management.

E-reader custom firmware development — papyrix

Built custom firmware for an e-reader device, adding a map viewer, knowledge base, and book processing pipeline.

2026 Feb

File tagging utility release engineering — intag2

Set up CI/CD pipelines, Microsoft Store publishing, and CLI features for the file-tagging tool.

Graph-powered code intelligence engine — jaxon

Developed a code intelligence tool that indexes codebases into a knowledge graph, adding LSP integration and multi-language support.

Telegram node for n8n automation — n8n-nodes-telepilot-2

Maintained a fork of the TelePilot n8n node, fixing authentication issues and adding new triggers.

2026 Jan

Firmware stability fixes — j-uni-hid

Addressed connectivity and restart issues in the HID firmware.

Computer vision for online poker — poker-cv

Developed a computer vision pipeline for analyzing online poker games, including hand detection and state recovery.

Aim assist tool updates — MEMU3

Continued work on the aim assist project, adding new modes and HID click emulation.

Task management Android app — tasker

Built a simple task management app for Android with touch event visualization.

2025 Dec

Firmware v11 feature expansion — j-uni-hid

Developed v11 firmware with new device support, BLE safety features, and performance profiles.

Autonomous AI coding tool — auto-claude

Worked on an autonomous multi-session AI coding assistant, adding squash merge and worktree management features.

Aim assist input emulation — MEMU3

Added USB HID mouse movement and rate limiting to the aim assist tool.

2025

Freqtrade strategy development — freqtrade_startegies

Created and refined trading strategies for Freqtrade, adding new strategy variants and performance optimizations.

Freqtrade Telegram bot monitoring — freqtrade-tg-multibot

Built a Telegram bot for monitoring Freqtrade instances, with profit tracking and web dashboard.

Telegram assistant bot — pAssistant

Developed a Telegram bot for content forwarding and summarization, with multi-target sending.

2024

Freqtrade trading strategy development — freqtrade_strats

Developed and optimized trading strategies for the Freqtrade bot, focusing on hyperparameter tuning and performance.

Crypto signal bot development — CryptoSignalerBot

Built a Telegram bot for crypto trading signals, integrating AI analysis and technical indicators.

File tagging utility early development — intag

Started the Windows Explorer file-tagging project, adding CLI and UI features.

ChatGPT Telegram bot — chatgpt_telegram_net

Maintained a .NET Telegram bot for ChatGPT, handling long messages and updates.

Experience

.NET Developer / Tech Lead

Deeplay · Full-time

Jun 2021 – Present · 4 yrs 11 mos

Software Development Engineer

Akvelon (vendor for Microsoft) · Full-time

Mar 2019 – Oct 2021 · 2 yrs 7 mos
Ivanovo, Russia

- Developer in the Microsoft App Center SDK team
- Worked on .NET, Android, Apple, Cordova, Xamarin and React Native App Center SDKs

Developer

ICVR · Full-time

Sep 2018 – Feb 2019 · 5 mos
United States (remote)

- Built JetSetTV, an Android TV application, from scratch in a couple of months
- Worked on bug fixes and new features in Unity
- Set up CI/CD with Unity Cloud Build + GitLab
- Built a barebones REST API with ASP.NET

Full-stack Android developer

Konstanta, LLC · Full-time

Jan 2016 – Apr 2018 · 2 yrs 3 mos
Arkhangelsk, Russia

- Designed and built Android applications for clients across multiple verticals
- Worked with cross-functional teams; integrated third-party APIs; wrote unit tests
- Developed and deployed several b2b systems on 1C:Enterprise
- Built software for tracking Parkinson's disease patients (prescriptions, treatments, signs, test results) on 1C:Enterprise

Full-stack ERP developer

Konstanta, LLC · Full-time

Aug 2012 – Jan 2016 · 3 yrs 5 mos
Arkhangelsk, Russia

- Specified, customized and tested 1C ERP/CRM features for end users
- Authored help documentation; defined ERP design and coding standards
- Worked with end users to translate business processes into technical solutions

Last 12 months on GitHub: 2,518 contributions · 2,155 public commits · 132 PRs · 195 reviews. Generated 2026-05-10.
