

Dmitrii Chichuk (@Jamminroot)

36 y/o

Not a big fan of pigeons

Recent activity

Focused on building a SaaS crypto trading platform, developing HID firmware and input drivers, and experimenting with on-device LLMs and computer vision. Also maintained several trading bots, Telegram automation tools, and a Windows file tagging utility.

Activity timeline (last 12 months)

2026 May

ESP32-S3 HID firmware v13 development — j-uni-hid

Worked on the next version of the feature-rich mouse and keyboard emulation firmware, adding fire-and-forget event emitting and an 8x8 matrix variant.

Windows input filter driver — input-driver

Built a KMDF input filter driver for capturing and injecting keyboard and mouse events, with push-style event delivery and integration testing.

Android TTS engine integration — j-tts-android

Iterated on the Android text-to-speech app, adding multiple TTS engines, pitch control, and intonation features.

CV-based aim assist and input emulation — MEMU3

Enhanced the computer vision and input emulation tool with GPU inference, new aiming modes, and overlay improvements.

2026 Apr

SaaS crypto trading platform rewrite — summit

Completed a major .NET rewrite of the algorithmic trading platform, adding deployment pipelines, MCP server, and full feature set.

ESP32-S3 HID firmware v13 refinement — j-uni-hid

Polished the v13 firmware variant with fixes and a new 8x8 matrix draft.

Windows Explorer file tagging utility — intag2

Maintained the file tagging tool, fixing changelog generation and preserving desktop.ini entries.

CV-based aim assist enhancements — MEMU3

Improved the aim assist tool with YOLO confidence thresholds, runtime fallback to USB-HID, and debug overlay.

2026 Mar

Crypto price prediction model research — crypto-model-research

Conducted extensive experiments with mixture-of-experts architectures and ensemble methods for a crypto prediction model.

On-device LLM with phone capabilities — ozwil-android

Built an Android app for running local LLMs with tool use, sub-agent delegation, and background processing.

Input emulation and overlay system — MEMU3

Rewrote the overlay to D3D11, added linger mode and autofire, and restricted aim assist to focused windows.

E-ink device custom firmware — papyrix

Developed a knowledge base app, map viewer, and improved book reading support for the xteink firmware fork.

2026 Feb

File tagging utility release management — intag2

Set up CI/CD pipelines, automated Microsoft Store publishing, and added CLI features for the Windows Explorer

tagging tool.

Graph-powered code intelligence engine — jaxon

Expanded the code analysis tool with LSP integration, more language parsers, and dead code detection.

YOLO labeling tool — yolo-labeler

Built a minimalistic, fast YOLO labeling tool with multi-select mark mode and batch operations.

Telegram automation node for n8n — n8n-nodes-telepilot-2

Maintained the n8n community node for Telegram, fixing authentication and CI issues.

2026 Jan

Computer vision for online poker — poker-cv

Developed a pipeline for detecting poker hands, board cards, and actions from video feeds.

ESP32-S3 HID firmware maintenance — j-uni-hid

Fixed a graceful COM restart issue in the firmware.

Input emulation tool updates — MEMU3

Made general updates to the CV and input emulation project.

File tagging utility feature additions — intag

Added support for additional metadata properties and prepared the v2.0 release for the Microsoft Store.

2025 Dec

ESP32-S3 HID firmware v11 development — j-uni-hid

Developed a major firmware update with new devices, BLE improvements, and performance profiles.

Autonomous AI coding tool — auto-claude

Worked on the multi-session AI coding assistant, adding squash merging and worktree completion features.

Input emulation and HID experimentation — MEMU3

Experimented with USB HID mouse movement and rate limiting for the aim assist tool.

2025

Telegram bot for Freqtrade monitoring — freqtrade-tg-multibot

Built a multi-bot Telegram interface for monitoring and managing Freqtrade trading bots.

Telegram assistant bot — pAssistant

Developed a Telegram bot for content forwarding, summarization, and multi-target sending.

Freqtrade trading strategies — freqtrade_strategies

Created and optimized numerous trading strategies with backtesting and hyperopt configurations.

Flutter app for Freqtrade monitoring — freqtrade_monitor

Built a mobile app with dashboard, charts, and trade monitoring for Freqtrade bots.

2024

Freqtrade strategy optimization — freqtrade_strats

Iterated on trading strategies, performing hyperopt optimization and backtesting.

Windows file tagging utility early development — intag

Started the file tagging project with CLI and UI foundations.

Experience

.NET Developer / Tech Lead

Deeplay · Full-time

Jun 2021 – Present · 4 yrs 11 mos

Software Development Engineer

Akvelon (vendor for Microsoft) · Full-time

Mar 2019 – Oct 2021 · 2 yrs 7 mos
Ivanovo, Russia

- Developer in the Microsoft App Center SDK team
- Worked on .NET, Android, Apple, Cordova, Xamarin and React Native App Center SDKs

Developer

ICVR · Full-time

Sep 2018 – Feb 2019 · 5 mos
United States (remote)

- Built JetSetTV, an Android TV application, from scratch in a couple of months
- Worked on bug fixes and new features in Unity
- Set up CI/CD with Unity Cloud Build + GitLab
- Built a barebones REST API with ASP.NET

Full-stack Android developer

Konstanta, LLC · Full-time

Jan 2016 – Apr 2018 · 2 yrs 3 mos
Arkhangelsk, Russia

- Designed and built Android applications for clients across multiple verticals
- Worked with cross-functional teams; integrated third-party APIs; wrote unit tests
- Developed and deployed several b2b systems on 1C:Enterprise
- Built software for tracking Parkinson's disease patients (prescriptions, treatments, signs, test results) on 1C:Enterprise

Full-stack ERP developer

Konstanta, LLC · Full-time

Aug 2012 – Jan 2016 · 3 yrs 5 mos
Arkhangelsk, Russia

- Specified, customized and tested 1C ERP/CRM features for end users
- Authored help documentation; defined ERP design and coding standards
- Worked with end users to translate business processes into technical solutions

Selected projects

summit · C#

SaaS crypto algorithmic trading platform with AI and neural network components.

j-uni-hid · C++

Feature-rich mouse and keyboard emulation firmware for ESP32-S3.

input-driver · C

Windows input filter and injection driver similar to Interception.

freqtrade_strats · Python

Personal trading strategy experiments for Freqtrade.

crypto-model-research · Python

R&D project for crypto price prediction models.

poker-cv · Python

Computer vision experiments for online poker platforms.

intag2 · C++

Assign tags to files and folders in Windows Explorer.

j-tts-android · Kotlin

Android TTS engine using Silero and phonetizers.

ozwil-android · Kotlin

LLM-powered Android assistant with phone control capabilities.

freqtrade-tg-multibot · C#

Multi-bot Telegram interface for Freqtrade with web dashboard.
