

Dmitrii Chichuk (@Jamminroot)

36 y/o

Not a big fan of pigeons

Recent activity

Focused primarily on building a SaaS crypto trading platform with AI capabilities, while also developing custom hardware firmware for input emulation and a Windows kernel-level input driver.

Activity timeline (last 12 months)

2026 Jun

SaaS crypto trading platform — summit

Polished the web build and authentication system for the AI-driven trading platform.

Minimal input automation tool — jolt

Started a new lightweight AutoHotKey alternative with a scenario engine and interception support.

2026 May

ESP32-S3 input emulation firmware — j-uni-hid

Iterated on feature-rich mouse and keyboard emulation firmware, adding new device variants and performance modes.

Windows input filter driver — input-driver

Developed a KMDF input filter driver with capture, injection, and push-style event delivery.

Android text-to-speech engine — j-tts-android

Worked on a multi-engine TTS implementation, adding new voice engines and pitch controls.

Computer vision aim assist tool — MEMU3

Enhanced a CV-based utility with GPU inference, new aiming modes, and overlay improvements.

2026 Apr

SaaS crypto trading platform — summit

Built out the core platform with a .NET rewrite, deployment pipeline, and major feature phases including billing and execution engine.

Custom e-reader firmware — papyrix

Developed custom firmware for an e-ink device, adding a map application and knowledge base browser.

Proxy client with custom transport — FICLash

Updated a proxy client fork with new transport support and API exposure.

2026 Mar

Crypto price prediction research — crypto-model-research

Conducted deep research on model architectures, running hundreds of experiments on a prediction model.

On-device LLM assistant for Android — ozwil-android

Built an LLM-powered assistant with phone-use capabilities, focusing on sub-agent delegation and model management.

E-ink note-taking launcher — blackboard-launcher

Developed a minimalist Android launcher centered around note-taking for e-ink devices.

2026 Feb

Windows Explorer file tagging utility — intag2

Polished a file and folder tagging tool for Windows Explorer, working on CI pipelines and store publishing.

Graph-powered code intelligence engine — jaxon

Expanded a codebase indexing tool with LSP integration and broader language support.

Neovim development environment — .dotfiles

Maintained a personal Neovim configuration, updating for compatibility and adding remote session support.

2026 Jan

Computer vision for online poker — poker-cv

Built a CV pipeline for analyzing online poker games, achieving high accuracy in hand and card detection.

2025

Autonomous multi-session AI coding tool — auto-claude

Developed an autonomous coding assistant with worktree management and git rules systems.

Telegram automation and content collection — freqtrade-tg-multibot

Worked on Telegram bot tooling for trading and content aggregation.

Freqtrade monitoring and strategies — freqtrade_monitor

Built a mobile monitoring app and iterated on trading strategies for the Freqtrade platform.

Experience

Tech Lead

Sep 2024 – Present · 1 yr 9 mos

Deeplay · Full-time

- Lead engineering on a real-time desktop application for intellectual/skill-based online games statistics and analytics; own architecture, roadmap, and the release pipeline shipping to 10+ target online platforms.
- Set technical direction and run ongoing code review as the primary quality gate.
- Hands-on across the stack: C# / .NET backend, Kotlin Android companion app, CI/CD, dynamic server configuration.
- Built and maintain internal frameworks — notably an image/video tool for previewing and scaling rectangular regions — adopted team-wide for QA and content production.

Lead .NET Developer

Oct 2023 – Aug 2024 · 10 mos

Deeplay · Full-time

- Owned end-to-end backend feature delivery (C# / .NET); drove cross-component design decisions and stability work.
- Coordinated release rollouts across 10+ target online platforms; tightened the deployment pipeline.
- Standardised internal tooling and authored team-wide operational runbooks; mentored junior engineers.
- Continued maintenance of the Android companion app (Kotlin) and internal annotation frameworks.

Senior .NET Developer

Jun 2021 – Sep 2023 · 2 yrs 3 mos

Deeplay · Full-time

- Shipped backend features (C# / .NET) for a real-time desktop application for intellectual/skill-based online games statistics and analytics, supporting 10+ target online platforms.
- Built and maintained the companion Android app (Kotlin): telemetry, CI/CD, dynamic server configuration, in-app updates.
- Authored internal frameworks including an image/video annotation tool for scaled rectangle previews — adopted across the team.
- Mentored junior engineers and wrote team onboarding documentation: workspace setup, conventions, operational runbooks.

Software Development Engineer

Mar 2019 – Oct 2021 · 2 yrs 7 mos

Akvelon (vendor for Microsoft) · Full-time

Ivanovo, Russia

- Developer in the Microsoft App Center SDK team
- Worked on .NET, Android, Apple, Cordova, Xamarin and React Native App Center SDKs

Developer

ICVR · Full-time

Sep 2018 – Feb 2019 · 5 mos
United States (remote)

- Built JetSetTV, an Android TV application, from scratch in a couple of months
- Worked on bug fixes and new features in Unity
- Set up CI/CD with Unity Cloud Build + GitLab
- Built a barebones REST API with ASP.NET

Full-stack Android developer

Konstanta, LLC · Full-time

Jan 2016 – Apr 2018 · 2 yrs 3 mos
Arkhangelsk, Russia

- Designed and built Android applications for clients across multiple verticals
- Worked with cross-functional teams; integrated third-party APIs; wrote unit tests
- Developed and deployed several b2b systems on 1C:Enterprise
- Built software for tracking Parkinson's disease patients (prescriptions, treatments, signs, test results) on 1C:Enterprise

Full-stack ERP developer

Konstanta, LLC · Full-time

Aug 2012 – Jan 2016 · 3 yrs 5 mos
Arkhangelsk, Russia

- Specified, customized and tested 1C ERP/CRM features for end users
- Authored help documentation; defined ERP design and coding standards
- Worked with end users to translate business processes into technical solutions

Selected projects

summit · C#

SaaS crypto algorithmic trading platform with AI and neural network components.

j-uni-hid · C++

Feature-rich mouse and keyboard emulation firmware for ESP32-S3.

input-driver · C

Windows input filter and injection driver similar to Interception.

crypto-model-research · Python

R&D project for crypto price prediction models.

poker-cv · Python

Computer vision experiments for online poker platforms.

intag2 · C++

Assign tags to files and folders in Windows Explorer.

j-tts-android · Kotlin

Android TTS engine using Silero and phonetizers.

ozwil-android · Kotlin

LLM-powered Android assistant with phone control capabilities.

freqtrade-tg-multibot · C#

Multi-bot Telegram interface for Freqtrade with web dashboard.

auto-claude · TypeScript

Autonomous multi-session AI coding tool.

Last 12 months on GitHub: 2,641 contributions · 2,292 public commits · 125 PRs · 191 reviews. Generated 2026-06-10.
