

# Dmitrii Chichuk (@Jamminroot)

36 y/o

Not a big fan of pigeons

---

## Recent activity

Heavy focus on a SaaS crypto trading platform and custom hardware firmware, alongside research projects in computer vision and crypto modelling. Continued development of Windows Explorer utilities, Android LLM assistants, and personal infrastructure tooling.

---

## Activity timeline (last 12 months)

### 2026 May

#### Profile card generator refinements — Jamminroot

Polished the automated CV timeline and profile card generation workflow.

#### Profile card rendering updates — jamminroot\_profile\_cards

Iterated on the custom SVG profile card generator and its automated deployment.

### 2026 Apr

#### SaaS crypto trading platform — summit

Continued building the AI-driven algorithmic crypto trading platform.

#### Proxy fork maintenance — Clash.Meta

Maintained a Mihomo fork with custom API support for a FIClash client.

### 2026 Feb

#### Telegram automation node for n8n — n8n-nodes-telepilot-2

Iterated on a Telegram integration node for n8n workflows, focusing on stability and new triggers.

#### Windows Explorer file tagging utility — intag

Polished the file and folder tagging extension for Windows Explorer, preparing store releases.

#### Personal Neovim development environment — .dotfiles

Maintained and updated a personal Neovim IDE configuration for compatibility and new features.

#### On-host YOLO labelling tool — yolo-labeler

Built a minimalistic, fast YOLO annotation tool for personal computer vision projects.

### 2026 Jan

#### Windows Explorer file tagging utility — intag

Released a major update for the Windows Explorer file tagging tool with extended property support.

#### Telegram automation node for n8n — n8n-nodes-telepilot-2

Worked on session handling and deployment support for the n8n Telegram node.

### 2025

#### SaaS crypto trading platform — summit

Actively developed the core AI and neural network components of a crypto trading platform.

#### ESP32-S3 input emulation firmware — j-uni-hid

Built feature-rich mouse and keyboard emulation firmware for embedded hardware.

#### Crypto price prediction research — crypto-model-research

Conducted R&D on predictive models for cryptocurrency price movements.

#### Computer vision for online poker — poker-cv

Explored computer vision techniques for analysing online poker platforms.

### Windows Explorer file tagging utility — intag2

Worked on a next-generation version of the Windows Explorer file tagging utility.

### On-device LLM assistant for Android — ozwil-android

Developed a pocket LLM assistant with phone use capabilities on Android.

### Trading strategy implementations — freqtrade\_startegies

Developed and tested custom trading strategies for the Freqtrade framework.

### Autonomous multi-session AI coding tool — auto-claude

Built tooling for autonomous, multi-session AI-assisted software development.

### CV and input emulation research — MEMU3

Researched computer vision combined with mouse and keyboard event emulation.

## Experience

---

### .NET Developer / Tech Lead

Jun 2021 – Present · 4 yrs 11 mos

Deeplay · Full-time

### Software Development Engineer

Mar 2019 – Oct 2021 · 2 yrs 7 mos

Akvelon (vendor for Microsoft) · Full-time

Ivanovo, Russia

- Developer in the Microsoft App Center SDK team
- Worked on .NET, Android, Apple, Cordova, Xamarin and React Native App Center SDKs

### Developer

Sep 2018 – Feb 2019 · 5 mos

ICVR · Full-time

United States (remote)

- Built JetSetTV, an Android TV application, from scratch in a couple of months
- Worked on bug fixes and new features in Unity
- Set up CI/CD with Unity Cloud Build + GitLab
- Built a barebones REST API with ASP.NET

### Full-stack Android developer

Jan 2016 – Apr 2018 · 2 yrs 3 mos

Konstanta, LLC · Full-time

Arkhangelsk, Russia

- Designed and built Android applications for clients across multiple verticals
- Worked with cross-functional teams; integrated third-party APIs; wrote unit tests
- Developed and deployed several b2b systems on 1C:Enterprise
- Built software for tracking Parkinson's disease patients (prescriptions, treatments, signs, test results) on 1C:Enterprise

### Full-stack ERP developer

Aug 2012 – Jan 2016 · 3 yrs 5 mos

Konstanta, LLC · Full-time

Arkhangelsk, Russia

- Specified, customized and tested 1C ERP/CRM features for end users
- Authored help documentation; defined ERP design and coding standards
- Worked with end users to translate business processes into technical solutions
